

SMART CONTRACT AUDIT

SMART-CONTRACTS.RU

Source code:

The source code of the smart-contract is available at:

<https://etherscan.io/address/0xe314ca4d2bd3eb37ca6f783828f7b22f0a60df33#code>

Conclusion:

When analyzing the above source code, our company did not reveal any critical errors and vulnerabilities.

The Token "Papusha Rocket Token" is located at:

0xA2fFB691Bfd6A3A9A1E0BE80e79b3f27c6804032

The token conforms to the ERC20 standard, which ensures correct operation of the Ethereum wallets and decentralized exchanges (such as EtherDelta), and the possibility to be placed on DEX.

The ICO smart-contract is located at: 0xe314ca4d2bd3eb37ca6f783828f7b22f0a60df33

The ICO logic is displayed in external software (Investor's Personal Area). The ICO contract releases tokens by commands from external software that calls the function externalPurchase(). When you release tokens, an Event is created that records the purchase parameters for the blockchain.

This smart contract can be used for ICO crowdsale

The audit was executed by the “Naumov Lab” company:

- Vasiliy Alekseev
- Aleksandr Naumov
